

WIZE® Core

The latest in the range
of WIZE wiring testers

SPHEREA
GET ELECTRONIQUE

WIZE® Core

*All the power
and flexibility
of a WIZE tester
in a compact size.*

A compact system

- Specially optimised for small configurations.
 - 19" - 1U rack up to 128 test points at 500 VDC
(64 test points at 1500 VDC)
 - 19" - 2U rack up to 512 test points at 500 VDC
(256 test points at 1500 VDC)
- Possible extension from the existing WIZE range

Ideal for all wiring test applications

- Continuity tests (2-wire and 4-wire) in isolation and component test
- Option to mix 500 VDC and 1500 VDC boards
- Low value shielding measurement by hardware inhibition and not by calculation or theoretical compensation of parasitic capacitances
- Testing and troubleshooting of dielectric faults without floating point

Phoenix control software

- Automatic learning of the reference beam
- Import of CAD data or data from concurrent programs
- Wiring assistance by test probe
- Automatic backup of test results with option to export to a MySQL database
- Fully configurable test report

Benefits

- Remarkable value for money
- Simple, user-friendly and intuitive control software
- Reliable product of WIZE test systems
- Efficient and responsive customer service
